Wall mounted integrated Voice Evacuation System - 100 W, 2 zones (A+B)
The PAW2000-VES series of the new PAW Miui range of integrated voice evacuation systems for emergency facilities, has been specifically designed for wall-mounting and equipped with control units, certified in compliance with EN 54-16:2008 / EN 54-4 standards. The PAW2102-V model is capable of managing 2 alarm zones, with an overall power of $\mathbf{1 0 0} \mathbf{W}$, as well as remote microphone stations and controlled inputs to be connected to a central fire-fighting system.

## FUNCTIONAL FEATURES

- Rated audio output: 100 W.
- Backlit 4.3" display with touch screen for selecting the alert and evacuation zones and enabling navigation for adjusting volume levels, configuring the equipment and viewing failures.
- Handheld fireman's paging microphone.
- Sending out of pre-recorded EVACUATION and ALERT messages.
- 4 off controlled input contacts, configurable for playing the evacuation and/or alert messages to the zone, for resetting the messages or for signalling the failure of an external equipment.
- 1 off auxiliary/music input configurable as a music source, a call with precedence activation or a call with automatic activation (VOX).
- 2 off configurable relay outputs.
- Local button for placing the system in an emergency state, equipped with its own LED.
- Local button for resetting the fault acoustic signal and stopping playing out of alarm messages.
- EN54-4 certified internal battery charger unit for 24 Vdc secondary power supply.
- Possibility to connect up to 4 PMB broadcasting microphone units or - as an alternative - up to 2 PMB132 remote emergency units.
- An optional extension card can be used for broadcast general calls towards other connected units or as an additional music input.
- Possibility to set a standby amplifier.
